About me: Data scientist with a strong foundation in computational methods, statistical modeling, and AI-driven solutions, currently working on mental health innovation at TheraBuddy. Experienced in analyzing complex datasets, developing machine learning models, and building data-driven applications to solve real-world problems. Passionate about using technology for good, collaborating with mission-driven teams, and creating meaningful impact.

Skills

Technical	• Machine Learning (Supervised & Unsupervised Learning, Deep Learning, Reinforcement Learning, Large Language Models) • Data Science (Preprocessing, Mining, Visualization) • Statistical Modeling • Time Series Analysis • Dynamical & Control Systems • Scientific Writing • Experimental Design
Tools and Languages	Python (NumPy, pandas, scikit-learn, PyTorch) • MATLAB • SPM • Git • LaTeX • bash • R • SQL • JavaScript • HTML • Docker • Cloud Platforms
Communication & Soft Skills	English (fluent) • German (native) • Excellent organizational & interpersonal skills

Experience

Research and Data Lead — **Dec 2024 — Present**
TheraBuddy (Mental Health Startup) — *Zurich/Remote*
- Conducting research to support the development of our engaging, gamified solution for preventative mental health care.
- Leading data science initiatives by defining data strategy, identifying key metrics, and exploring AI/ML techniques and datasets to drive product innovation.

Affiliated Researcher — **June 2023 — Sept 2024**
Applied Computational Psychiatry Lab, Mental Health Neuroscience Department, Division of Psychiatry & Max Planck UCL Centre for Computational Psychiatry and Ageing Research, Queen Square Institute of Neurology — *London, UK*
- Conducted advanced statistical modeling for mental health research.
- Applied reinforcement learning and survival analyses to predict relapse in large-scale clinical trials.
- Published in peer-reviewed journals.

Postgraduate Researcher — **Oct 2018 — June 2023**
Max Planck UCL Centre for Computational Psychiatry and Ageing Research — *London, UK*
Supervisors: Prof Quentin Huys & Prof Ray Dolan (passed with no corrections)
- Developed and applied machine learning models to analyze mental health data.
- Modeled mood dynamics using dynamical/control systems and time series methods.
- Designed and conducted behavioral studies on psychological interventions.
- Published scientific findings and presented research at international conferences.

Graduate Researcher — **Mar 2017 — Jan 2018**
Translational Neuromodeling Unit — *Zurich, Switzerland*
Supervisors: Prof Klaas Enno Stephan & Prof David Paul Wolfer
- Analyzed fMRI data using Dynamic Causal Modeling (DCM) and machine learning approaches to investigate cognitive processes and mental health disorders.

Research Assistant — **Nov 2015 — Nov 2016**
University Hospital Zurich, Clinic for Psychiatry and Psychotherapy — *Zurich, Switzerland*
- Conducted cognitive experiments and collected physiological & fMRI data.
- Assisted in a meta-analysis and statistical evaluations of psychiatric studies.

Education

DAS in Data Science (Specialization in Machine Learning and Artificial Intelligence), *ETH Zurich* — 2024 - Present
Department of Computer Science — *Zurich, Switzerland*

PhD in Computational Psychiatry, *University College London* — 2018 - 2023
Max Planck UCL Centre for Computational Psychiatry and Ageing Research — *London, UK*

MSc in Health Science and Techonolgy with a Major in Neuroscience, *ETH Zurich* — 2015 - 2018
Department of Health Sciences and Technology — *Zurich, Switzerland*

BSc in Health Science and Techonolgy, *ETH Zurich* 2012 - 2015
Department of Health Sciences and Technology *Zurich, Switzerland*

Volunteering

Organizer, "Methods for Dummies" Seminar Series, UCL Nov 2021 — Jun 2022
Mentor, In2scienceUK Sept 2020 — July 2021
Postgraduate Student Representative, COMP2PSYCH Program Aug 2020 — Dec 2022

Honors and Awards

IMPRS COMP2PSYCH PhD Scholarship, issued by Max Planck Society Oct 2018 — Oct 2022
